I do not have any potential conflict of interest
Case History

• 42 year old male
• Smoker
• Right critical limb ischemia
• CT angio – bilateral common Iliac artery occlusion with right popliteal artery occlusion
PLAN

• Right common iliac angioplasty
• Failed right side puncture inspite of multiple attempts
• Did not use USG guided puncture
• Hence decided to puncture left femoral
Lessons Learnt

• Hardware
• Guided Punctures
• Judicious use of combined procedures to salvage the outcome
• Thank You
